OPEN HOME FOUNDATION

Sendspin

Build premium audio on your own terms

An open alternative to Apple AirPlay and Google Cast, with extra control and visualization features to create a truly immersive music experience for your customers.

Global market opportunity

As part of the Open Home Foundation, Sendspin is a gateway to the world's largest open source smart home ecosystem. By adopting this protocol, you gain access to a global community of millions of Home Assistant and Music Assistant users actively seeking interoperable hardware.

Protected by Swiss non-profit governance: The Open Home Foundation ensures Sendspin remains a permanent, open protocol that cannot be bought, closed off, or put behind a paywall — protecting your investment.

Key benefits

Elevate your offering

Syncs audio, visuals, and lighting seamlessly for a premium experience

Enrich your ecosystem

Gives customers flexibility to mix and match products and brands

Broaden your reach

Opens access to new communities and users across platforms

Protect your margins

Runs on cost-effective ESP32 micro-controllers, with no proprietary fees

Partner with us

We are currently inviting a select group of manufacturers to prepare Sendspin for mass-market commercial deployment. Join the first wave of Sendspin-enabled hardware to ensure the protocol is optimized for your products, and capture a first-to-market advantage.
